

Daniel Osei

Summary

I am currently studying programming for games and looking for relevant work to get a foot in the industry. I am very passionate about the games industry and the various disciplines which comprise games. I am hoping to develop my communication skills and become more financially independent. Skills

- C, C++ and C#
- Python & SQL
- Back-End development
- OOP and Procedural Programming
- Mathematics
- Troubleshooting
- Machine learning concepts understanding
- Agile development methodologies
- Testing and debugging
- Team player

Experience

PROJECT DEVELOPER 02/2024 - 03/2024

Ravensbourne

This project was a collective effort between the whole of my second year cohort. I was put in charge of making the core movement for the player and helped with some other things as well.

Education

Bachelor of Science, Games Programming, 2025

Ravensbourne University London, London
